

Easyrig 2 600N Stabilizing Camera Support

Gimbal Support System

The Easyrig 2.5 600N Stabilizing Camera Support is a cost effective system which can be used with both film and video cameras. Ergonomically designed, the Easyrig reduces the static load on the neck and shoulder muscles, and distributes it to other parts of the body which are more capable of handling it.

Easyrig Vario 5 with Gimbal Rig Vest and 5" Extended Arm

Gimbal Support System

The Easyrig Vario 5 with Gimbal Rig Vest and 5" Extended Arm is a body-worn support system that is adjustable to support camera rigs weighing 11 to 38 lb. The system works by using a suspension line to support the weight of the gimbal rig, taking the load off your shoulder, neck, and arm muscles and distributing it across your torso. The tension line is adjustable by turning a screw in the back, letting you dial in the appropriate amount of tension for your rig. The system consists of the Gimbal Rig vest, a Vario 5 standard support bar, and a 5" extended support arm that has been pre-drilled for the Flowcine Serene. As the name suggests, the Gimbal Rig vest is optimized for use with motorized gimbal stabilizers, providing increased lower back support that allows you to carry weights further away from your body. A carrying bag is also included for convenient storage and transport of the Easyrig system.

Tilta Armor Man 3.0 Gimbal Support System

Gimbal Support System

The Tilta Armor Man 3.0 allows you to attach a gimbal and achieve even better stability with it while taking its weight off your arms. It supports most full-size gimbals on the spring-loaded arms, including the Tilta Gravity, Freefly MoVI, and DJI Ronin. You'll be able to boom the gimbal down as far as possible to the ground, with your focus more on the shot than on the weight of the gimbal and load. You can also easily adjust camera settings, as the Armor Man pretty much holds your gimbal up all on its own, leaving your hands virtually free.

Tilta Armor Man 2 Gimbal Support System

Gimbal Support System

As great as a gimbal stabilizer is, you still have to hold it with your arms the whole time. The Tilta Armor Man 2 is designed to take the weight off your arms, allowing for an entirely different experience. This version of the Armor Man 2 comes with a V-mount plate attached to the vest.

bebob V290RM-CINE 14.8V 293Wh High Load V-Mount Li-Ion Battery

Batteries

Bebob high load batteries are designed to be mounted on cinema cameras via optional adapters that allow for 20A of discharge current. When used without an adapter, they support up to a 10A draw. The Bebob V290RM-CINE 14.8V 293Wh High Load V-Mount Li-Ion Battery is compatible with the ARRI BAB-HV V-mount battery adapter for the Alexa LF, the Bebob ML-120V/V HL V-mount adapter, and the Bebob CINE-VMM-HL V-mount adapter. The battery and adapter safely combine to continuously deliver 20A with no risk to the connector pins nor the battery cells.

IDX System Technology DUO- C198P 193Wh High-Load Li- Ion V-Mount Battery

Batteries

Power your professional V-mount cameras such as the RED WEAPON or ARRI ALEXA Mini along with other professional devices with this DUO-C198P 193Wh High-Load Li-Ion V-Mount Battery from IDX System Technology. Featuring a V-mount, the compact battery is only 2.3" thick, but packs a large 193Wh, 9.9Ah capacity, providing 14.54V to your gear with a 14A maximum draw. It is well suited for digital cinema cameras and camera stabilizer systems where long runtimes are required, and its battery data information displays in most cameras' viewfinders.
